CAN THESE THINGS BE!

BAITS TO CATCH GUDGEONS ARE, IT SEEMS, AS COMMON IN THE SHOR TRADE AS IN ANY OTHER, AND READERS OF ADVERTISEMENTS MUST HAVE OBSERTED WHAT REMARKABLE BARGAINS ARE BEING OFFERED IN MEN'S SHOES. FIVE DOLLARS IS NAMED IN SOME QUARTERS AS THE PRICE OF A SHOE "WARRANTED TO BE HAND SEWED AND OF CAREFULLY BELECTED PRENCH CALPSKIN, EQUAL TO ANY CUSTON MADE SHOE AT DOUBLE THE ABOVE PRICE."

NOW, WE ARE DOING AN EXTENSIVE SHOE BUSI-NESS OURSELVES, AND ALTHOUGH WE BUY OF FIRST HANDS IN LARGE QUANTITIES AND FOR CASH, AND SELL AT A VERY MODERATE PROFIT WE CANNOT SUPPLY A FIRST-CLASS HAND-SEWED FRENCH CALF SHOE (ONE WE WILL GUARANTEE) FOR 85. ACCORDINGLY WE HAD A FRIEND BUY A PAIR OF THE SHOES ADVERTISED, AND, AFTER ERASING THE DEALER'S NAME, WE SUBMITTED ONE OF THE SHOES TO MESSES, HANAN & SON, AS FOLLOWS:

MESSES HANAN A BON

86 per pair?

DEAR SIRS:

Herewith we send you a shoe regarding which we wish some information. As experts, will you please etate:

First-Is this shoe made of good French Calfakin and is it hand sewed ? Second-Can a man's first-class hand-made shoe French Calfakin be produced and retailed at a profit for

> ROGERS, PEET & CO. REPLY.

MESSRS, ROGERS, PEET & CO. DEAR SIRE:

Replying to your inquiry of this date, after dissecting the shoe you sabmit, and decide: First-That the sewing is hand work, but of the mos-

nferior character. The "vampe" or uppers are unques ionably American calfekin, hemlock tanned, while the oottom is of spongy "Union" or second grade sole leather, such as we never use in oven our lowest quality nachine sewed goods.

Second-It is impossible to produce a man's first class hand-made shoe of French calfakin to retail at a profit for \$5 a pair.

HANAN & SON. THE OPINION OF OTHER EXPERTS IS THAT THE HANAN" SHOES WE RETAIL FOR \$4.75 AND \$5 ARE

SUPERIOR EVERY WAY TO THIS SHOE-ONLY WE WILL NOT TELL YOU THEY ARE "PRENCH CALP" ANY MORE THAN WE'D TELL YOU A WOOL HAT WAS PUR, OR A SUIT OF COTTON WARP CASSIMERE WAS ALL WOOL" WE FIND THAT THE SAPEST PLAN IS TO TELL THE TRUTH, AND WE ARE BUILDING UP A HAT AND SHOE BUSINESS ON THAT BASIS JUST AS WE DID OUR BIG CLOTHING BUSINESS.

TRUTH ABOUT OLEOMARCARINE.

Chairman of the Committee on Manufac tures of the House of Representatives addressed a letter to Prof. Charles P. Chandler. President of the New York Board of Health, inform ing him that the Committee had under consideration a bill in relation to adulterations in food and drink and asking whether the article known as Olso margarine or Butterine is wholesome or unwhole some, and for such other information as might be in the possession of the Board. The following t Prof. Chandler's response:

Health Department, 301 Mott st., | New York, March 27, 1880. In reply to your letter of inquiry I would say that

in its application in the manufacture of artificial butter called "Butterine" or "Oleomargarine," since the date of its first publication. I have frequently seen it manufactured witnessing all the operations, and examining both the material and

have been familiar with the discovery of Mege Mourie

I have studied the subject with special reference to the question of its use as food in comparison with the ordinary butter made from cream, and have satisfied myself that it is quite as valuable as the butter from the cow; that the material from which it is manufac-tured is perfectly fresh beef suct; that the processes are harmless; that the manufacture is conducted with great cleanliness. The product is palatable and whole some, and I regard it as a most valuable article of food and consider the discovery of Moge Mouries as marking an era in the chemistry of the fats. Butterine is manufactured of uniform quality the year

round, and can be sold at a price far below that at which ordinary butter is sold. It does not readily become rancid, and is free from the objectionable tasts and odor which characterize a large proportion of the butter sold

ture of the State of New York, requesting the Board of Health of the city of New York to investigate the subject and report whether in its opinion the Butterine is a wholesome article of food. In response to this resolution the Board of Health stated that in its opinion there is no

ment chemists and scientists in this country, based on personal examination and investigation; and yet s comnittee consisting of three State Senators representing dairy districts, with an attorney from the State Dairymen's Association, have been holding an investigation, in which absurd stories to the discredit of elecmargarine were eagerly accepted as "evidence," while there was a manifest reluctance to bring out facts which exist to its credit. The local Board of Health was ignored: the committee did not visit a single ofcomargarine factory,

vidently preferring to accept the imagination of the

artists of the comic papers to prove that eleomargarine

o Albany and reported a bill prohibiting its manufacture

or sale, and placing thirty thousand deliars at the dis-

posal of the State Dalrymen's Association to enforce the law. In view of this extraordinary difference of opinion as to the cleanliness and wholesomeness of this article, attention is invited to the following points: IF OLEOMAR-GARINE IS DANGEROUS TO HEALTH IT SHOULD BE PROHIBITED, but it is not.

The inilliens of pounds consumed without detriment confirm the opinions of the eminent chemists above ally consumption in other forms without objection. within reasonable limits that the dairyman objects, and why should the farmers, who produce the beef fat, ard, or oils, be discriminated against to enable the dairy outter! The only trouble about the business is that decuargarine is so good that retail dealers, knowing that it is better than poor butter, wrongly sell it us butter. It is a fact known to every dealer that oleomargarine has to bear the odium of bad butter; consumers faily stigmatize bad butter as "eleomargarine," while it is safe to say that there is no electrorary made that is so unpalatable or nuwholesome as rangid butter. If consumers will insist ou their grocer getting them a sample of electrorary manual transfer of the sample of the sam they will see this is true. At present grocers have a double motive for its fraudulent sale: 1st. To avoid prejudice, 2d. Towske more profit. If the lies told about its uncleasiness were stopped, and inspectors provided to make grocers sell it for what it is, there would be no trouble, and dairymen, manufacturers of dairy substi-tutes, grocers, and consumers, would all have a fair
